## Disclaimer

The information contained in the Document is for general information purposes only.

The Company assumes no responsibility for errors or omissions in the contents of the Document.

In no event shall the Company be liable for any special, direct, indirect, consequential, or incidental damages or any damages whatsoever, whether in an action of contract, negligence, or other torts, arising out of or in connection with the use of the contents of the Document. The Company reserves the right to make additions, deletions, or modifications to the contents in the Document at any time without prior notice.

## Errors and Omissions Disclaimer

The information given by the Document is for general guidance on matters of interest only. Therefore, errors can occur even if the Company takes every precaution to ensure that the Document's content is current and accurate. Plus, given the changing nature of laws, rules, and regulations, there may be delays, omissions, or inaccuracies in the information contained in the Document.

The Company is not responsible for any errors or omissions, or for the results obtained from the use of this information.

## Fair Use Disclaimer

The Company may use copyrighted material that the copyright owner has not explicitly authorized. The Company is making such material available for criticism, comment, news reporting, teaching, scholarship, or research.

The Company believes this constitutes a "fair use" of any such copyrighted material as provided for in section 107 of the United States Copyright law.

If You wish to use copyrighted material from the Document for your own purposes that go beyond fair use, You must obtain permission from the copyright owner.

## "Use at Your Own Risk" Disclaimer

All information in the Document is provided "as is", with no guarantee of completeness, accuracy, timeliness or of the results obtained from the use of this information, and without warranty of any kind, express or implied, including, but not limited to warranties of performance, merchantability and fitness for a particular purpose.

The Company will not be liable to You or anyone else for any decision made or action taken in reliance on the information given by the Service or for any consequential, special or similar damages, even if advised of the possibility of such damages.

# Introduction

Vitextra offers a range of SPFx-based products that extend the functionality of **SharePoint Online** and **Microsoft Teams**.

This article is a step-by-step guide to installing a Vitextra product in your SharePoint Online environment, including the prerequisites and permissions you need for a smooth installation.

# Prerequisites

## Environment

Vitextra **SPFx**-based products can be installed only on Microsoft 365 (SharePoint Online and Microsoft Teams).

**Warning**

Vitextra SPFx products cannot be installed on SharePoint on-premises 2016/2019.

## Required Permissions

### Tenant Admin Access

You must have the SharePoint Administrator role in your Microsoft 365 tenant. This role gives you the authority to manage the **App Catalog** and install apps across the SharePoint Online environment.

### App Catalog Permissions

Within the App Catalog site, you need *Full Control* permissions. This lets you upload, manage, and delete apps, including SPFx packages.

### User Permissions for End Users

While not directly related to installation, make sure the users who will use the SPFx web parts have permission to access the site and its content. This usually means at least Read permission on the site where the web part is deployed.

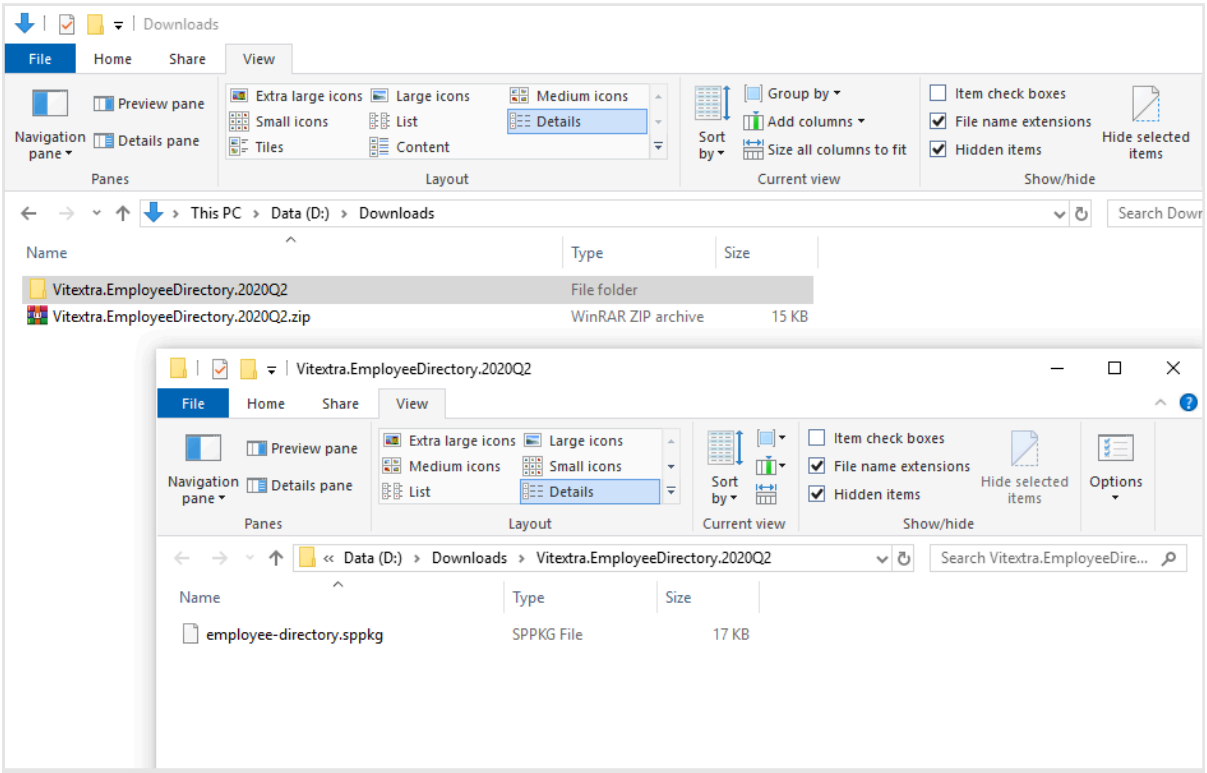

## Installation Package

First, download the product package. You can get it from the Vitextra Download Center or **Microsoft AppSource**.

**Tip**

The Download Center often provides the latest updates and features more quickly than AppSource.

Download the product's ZIP file (*.zip) and extract it somewhere on your computer.

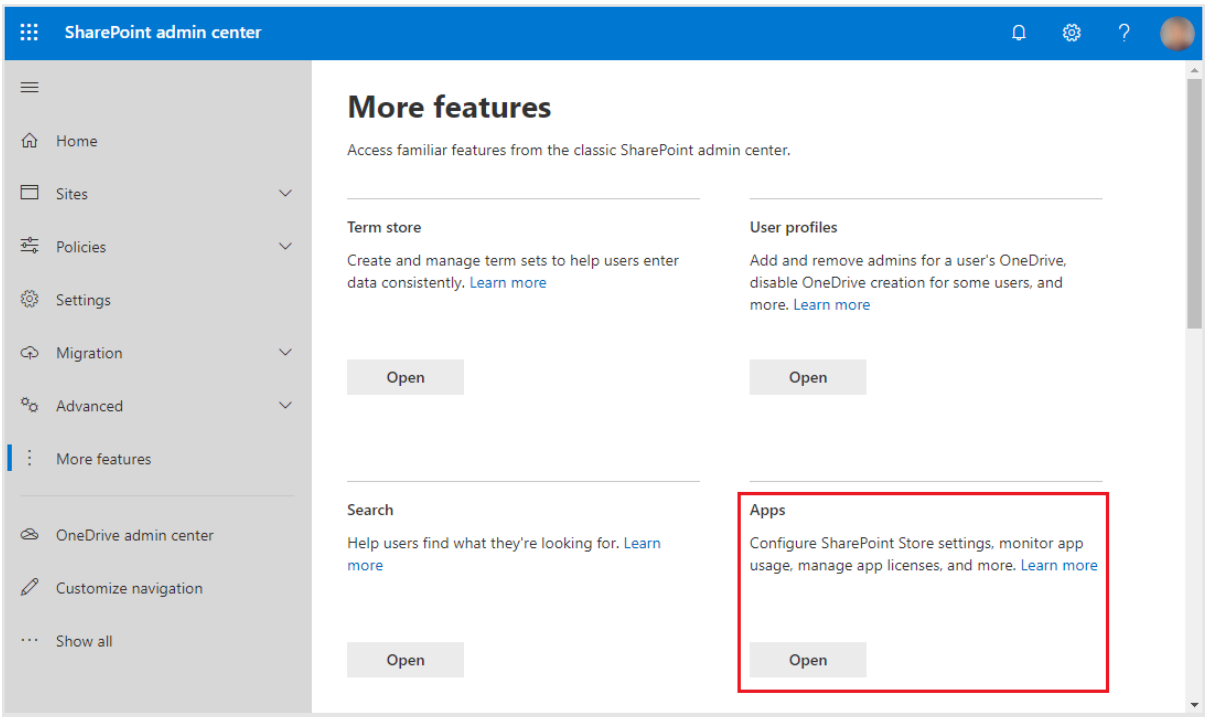

*Extracted installation package (.sppkg)*

# Installation

Step-by-step instructions:

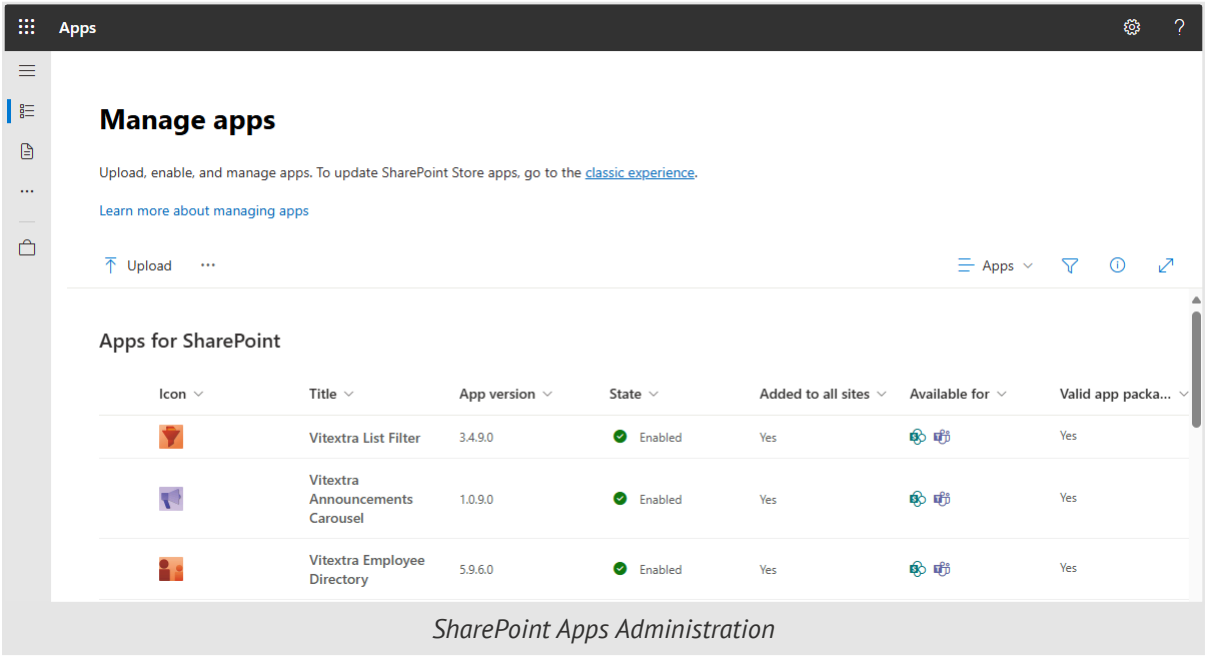

1. From the Microsoft 365 admin center, navigate to the SharePoint admin center.

2. Go to **More Features** and click the **Open** button under the **Apps** heading:

*SharePoint Admin Center*

3. Click **App Catalog** to manage your SharePoint apps.

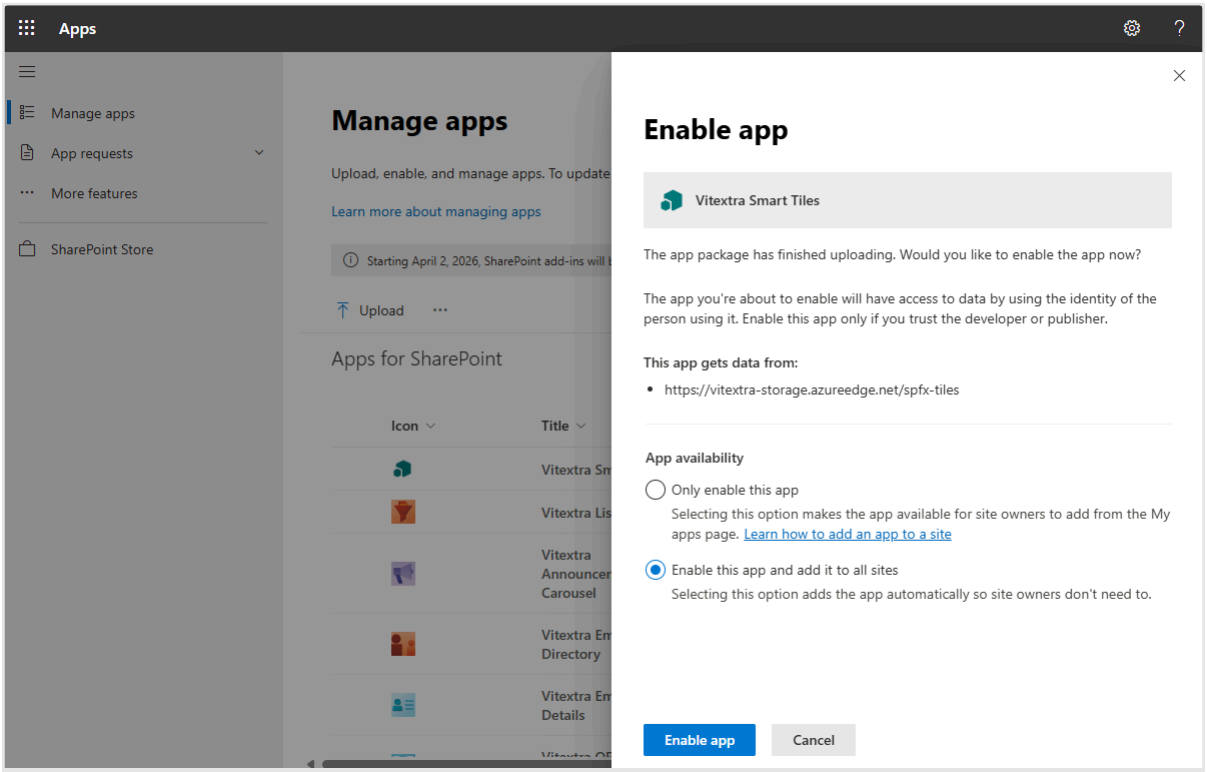

*SharePoint Apps Administration*

4. Click the **Upload** button and select the extracted .sppkg file.

**Warning**

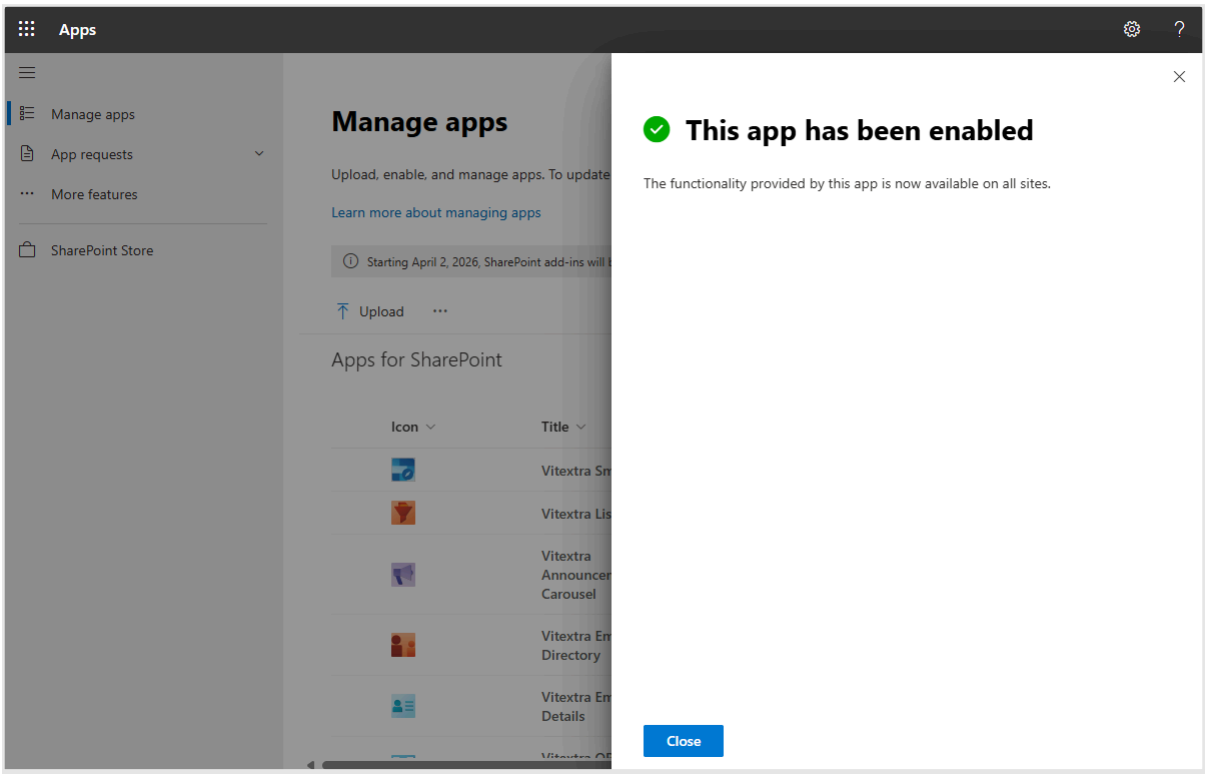

Make sure to extract the .zip archive before uploading. You must upload the extracted .sppkg file, not the .zip file itself.

5. After you upload the package, SharePoint Online prompts you to trust the solution — a security measure to ensure the app meets your organization's compliance standards. Click **Install** to confirm the installation.

*Deploy confirmation*

6. Once deployed, the package appears in the list of installed client-side packages, confirming a successful installation.

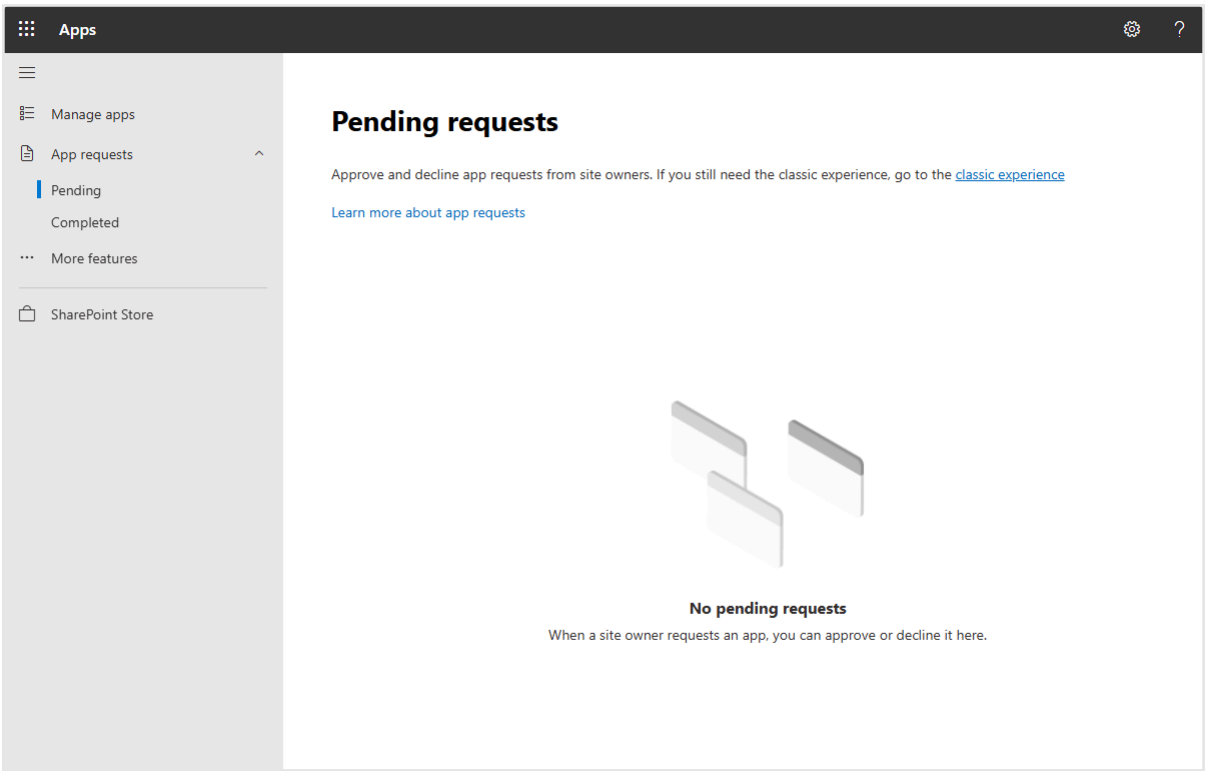

*Successful installation confirmation*

# API Access

To grant the installed app the permissions it needs to access the API, go to **Pending** under the **App Requests** heading in the left navigation menu.

There, you can approve any API access requests generated during installation.

*SharePoint API Access Requests*

# Summary

Installing a Vitextra product in SharePoint Online comes down to a few key steps: confirming the right environment and permissions, downloading and uploading the installation package, and approving any API access requests.

With these steps done, the Vitextra solution is integrated into your SharePoint environment and ready to use.

# Terms

**App Catalog**
The App Catalog is a special SharePoint site that stores apps for SharePoint, Teams, and other Microsoft 365 services. Global or SharePoint administrators can upload and manage applications from the AppSource marketplace, custom-developed apps, or third-party apps for the organization's internal use. There can be only one tenant-level App Catalog in a tenant; site collection app catalogs can be added for individual site collections.

**AppSource**
Microsoft AppSource is a global online marketplace with applications and services created for Microsoft 365, Dynamics 365, Power BI, Power Platform, and other Microsoft services. AppSource allows you to find, purchase, and deploy applications in your organization's tenant.

**Microsoft Teams**
Microsoft Teams is a chat-based collaboration platform for business communications with features for online meetings, live events, and document sharing.

**SharePoint Framework (SPFx)**
SharePoint Framework (SPFx) is a model for building client-side web parts, components, and extensions for SharePoint Online, SharePoint Server (on-premises), and Microsoft Teams. SPFx customizations are based on JavaScript and support the modern user interface natively.

**SharePoint Online**
The cloud version of SharePoint, a web-based collaboration platform within Microsoft 365 that provides an extensive range of capabilities to store, share, and manage the digital information, content, and knowledge of an organization.
