Disclaimer

The information contained in the Document is for general information purposes only.

The Company assumes no responsibility for errors or omissions in the contents of the Document.

In no event shall the Company be liable for any special, direct, indirect, consequential, or incidental damages or any damages whatsoever, whether in an action of contract, negligence, or other torts, arising out of or in connection with the use of the contents of the Document. The Company reserves the right to make additions, deletions, or modifications to the contents in the Document at any time without prior notice.

Errors and Omissions Disclaimer

The information given by the Document is for general guidance on matters of interest only. Therefore, errors can occur even if the Company takes every precaution to ensure that the Document's content is current and accurate. Plus, given the changing nature of laws, rules, and regulations, there may be delays, omissions, or inaccuracies in the information contained in the Document.

The Company is not responsible for any errors or omissions, or for the results obtained from the use of this information.

Fair Use Disclaimer

The Company may use copyrighted material that the copyright owner has not explicitly authorized. The Company is making such material available for criticism, comment, news reporting, teaching, scholarship, or research.

The Company believes this constitutes a "fair use" of any such copyrighted material as provided for in section 107 of the United States Copyright law.

If You wish to use copyrighted material from the Document for your own purposes that go beyond fair use, You must obtain permission from the copyright owner.

"Use at Your Own Risk" Disclaimer

All information in the Document is provided "as is", with no guarantee of completeness, accuracy, timeliness or of the results obtained from the use of this information, and without warranty of any kind, express or implied, including, but not limited to warranties of performance, merchantability and fitness for a particular purpose.

The Company will not be liable to You or anyone else for any decision made or action taken in reliance on the information given by the Service or for any consequential, special or similar damages, even if advised of the possibility of such damages.

Introduction

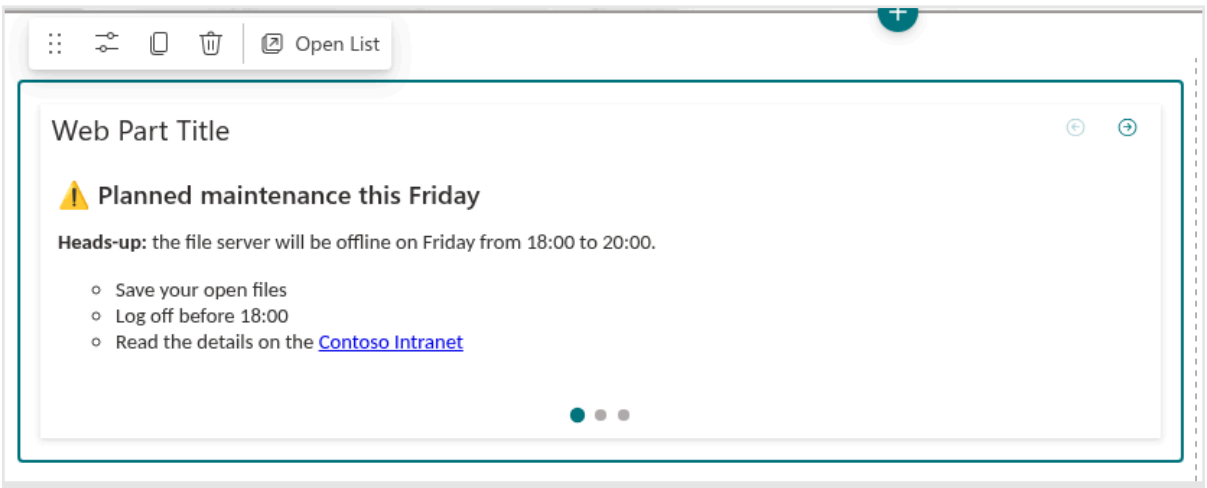

The Announcements Carousel web part does not have its own content storage. Every card it shows is an item in a standard SharePoint announcements list. To publish news on the page, editors work with this list in the familiar Microsoft Lists interface, and the web part picks up the changes automatically.

This article is for editors. It explains how to open the list, which fields of an announcement the web part uses, and how each field affects the card that readers see. If the web part has not been added to the page yet, start with KB10208. Announcements Carousel: Getting Started.

Opening the Announcements List

There are three ways to open the list connected to the web part:

1 **The Open List button in the web part toolbar.** In Edit mode, select the web part and click **Open List** in the toolbar above it.
2 **The Open List link in the property pane.** Open the web part settings; the link is the first item in the **Data Source** group.
3 **Site contents.** Go to **Site contents** on your SharePoint site and open the list by name.

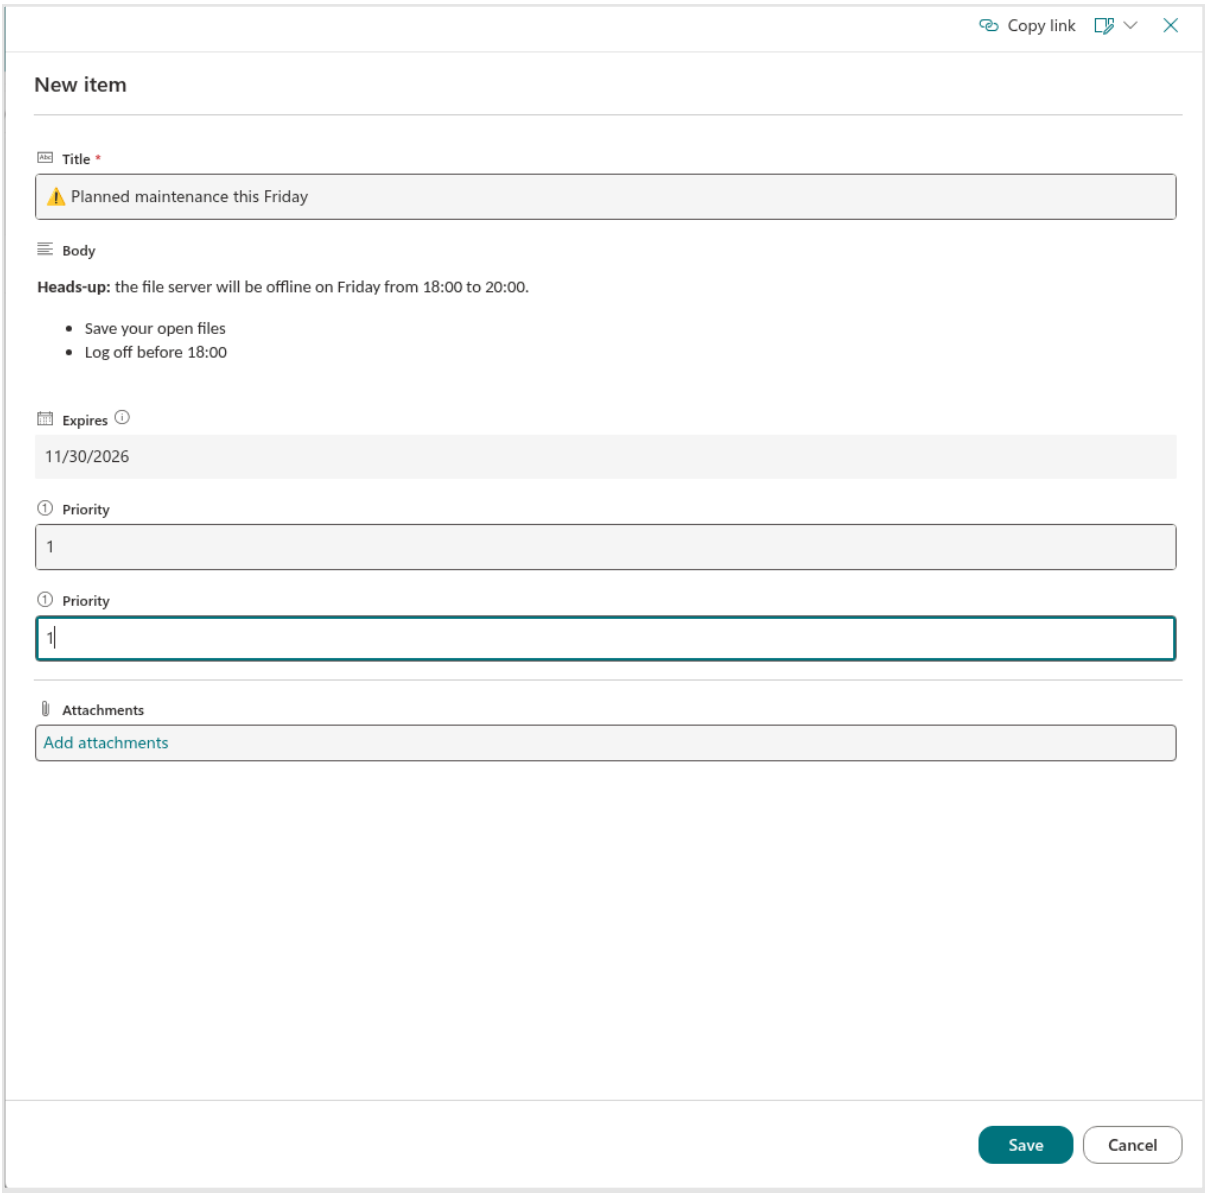

The Open List button in the web part toolbar

Note

To add and edit announcements, you need at least **Contribute** (Edit) permissions for the list. Readers of the page only need read access.

Adding a New Announcement

1 Open the announcements list.
2 Click **New** on the command bar.
3 Fill in the **Title** — it is required and is displayed as the card heading.
4 Enter the announcement text in the **Body** field.
5 If necessary, set the **Expires** date and attach files (see below).
6 Click **Save**.

The new announcement form

The new announcement appears in the web part the next time the page is loaded.

Warning

If content approval is enabled for the list, a new announcement is created in the **Pending** status and is not shown to readers until it is approved. See KB10230. Publishing Announcements with Content Approval.

How Announcement Fields Appear on the Card

The web part reads the following fields of a list item:

Field	Where it appears	Web part option
Title	Card heading	Always shown
Body	Main card text with formatting	Always shown
Attachments	List of file links under the text	**Attachments**
Expires	The announcement is hidden after this date; with the meta line on, the date is shown as "Expires …"	**Show author and date** (for the label)
Created By, Created	Meta line under the title	**Show author and date**
Color	Accent bar along the edge of the card	**Show color tag**
Emoji	Icon before the heading	**Show emoji**

Body Text

The **Body** field is a rich text field. Formatting is preserved on the card: bold and italic text, lists, links, and so on. Keep the text short: in the Carousel layout the card has limited space, and a long text forces readers to scroll.

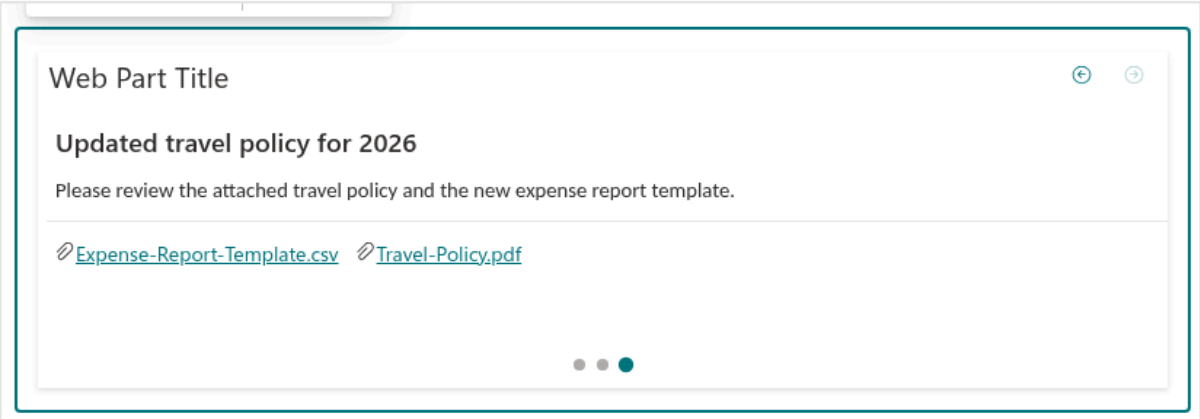

Tip

Put the main point in the first sentence and move details to an attached document or a link to a news page. This keeps cards easy to read at a glance.

Attachments

Files attached to an announcement are shown below the text as a list of links with a paper clip icon. Clicking a link opens the file in a new browser tab. Lists created from the web part have attachments enabled.

The attachments list is displayed when the **Attachments** option is turned on in the **Appearance** group of the property pane (on by default).

Attachments on an announcement card

Expiration Date

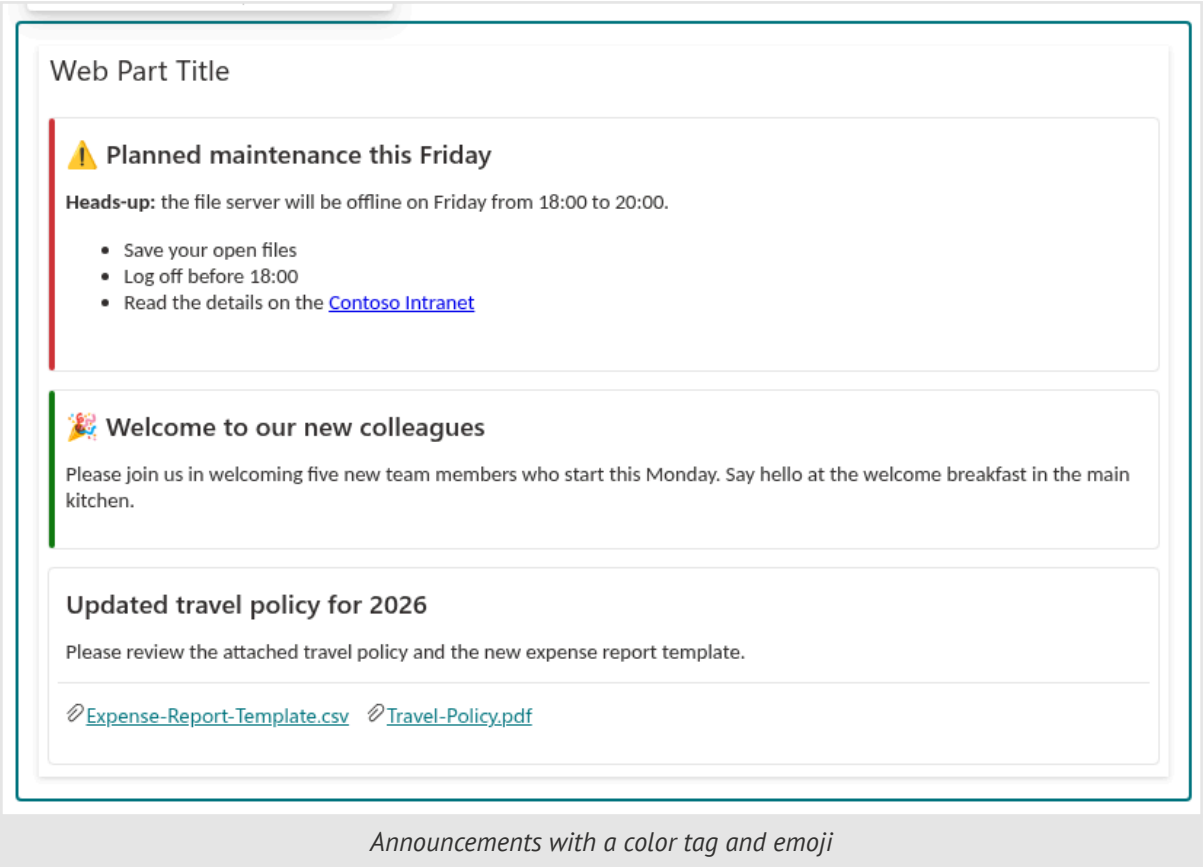

The **Expires** field sets the date after which the announcement is no longer relevant. The web part shows the announcement through the end of the specified day and then hides it automatically — you do not have to delete or edit the item. Announcements without an expiration date are shown indefinitely.

Tip

Set an expiration date for every time-limited announcement — an event, a maintenance window, an enrollment deadline. The page stays up to date without manual cleanup, and the history remains in the list.

Color Tag and Emoji

Items in a modern announcements list can have a color and an emoji. The web part shows the color as an accent bar along the edge of the card and the emoji before the heading. This helps readers tell categories of announcements apart at a glance: for example, red for urgent notices and green for events.

Announcements with a color tag and emoji

Note

If a color or emoji is not set for an item, the corresponding element is simply not shown. Administrators can also hide them for all cards with the **Show color tag** and **Show emoji** options.

Editing and Removing Announcements

To change an announcement, open it in the list, click **Edit**, make the changes and save. The web part shows the updated content the next time the page is loaded.

To remove an announcement from the page, you have three options:

- **Set an expiration date** in the past or today — the announcement disappears from the page but stays in the list.
- **Reject or unpublish it** if the list uses content approval.
- **Delete the item** — it goes to the site recycle bin.

Warning

When the list has no announcements to show, the web part hides itself completely in Read mode. In Edit mode, it shows the message "There are no items to display" so you can see it is still on the page.

Conclusion

Announcements are managed with the standard Microsoft Lists tools, so editors do not need to learn anything new. A title, a concise body, attachments when needed and an expiration date for time-limited news are all it takes to keep the carousel current. To learn how the web part selects and orders announcements, continue with KB10229.
